PLS — 65 cm / 120 cm

PL — 80 cm / 130 cm

Different arms

Automatic switching of suction and blowing from the surface to the arm.

Tools for spotting

LEADER IN ERGONOMY

Every detail is designed to provide an easy and comfortable user experience.

Spring aided adjustment of height. One person can adjust the surface height, with no tools.

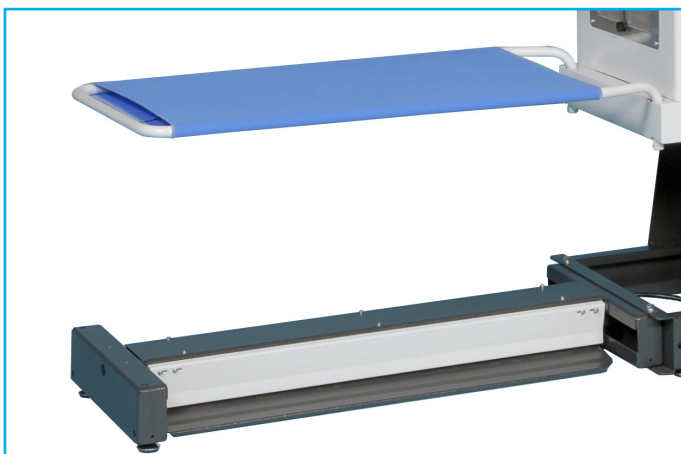

Rear casters for easy repositioning.

Independent adjustment of suction and blowing strenght. Electronic control of switching from blowing to suction.

Professional Trevil steam electric iron, that can be used with the right or the left hand.

Garment tray.

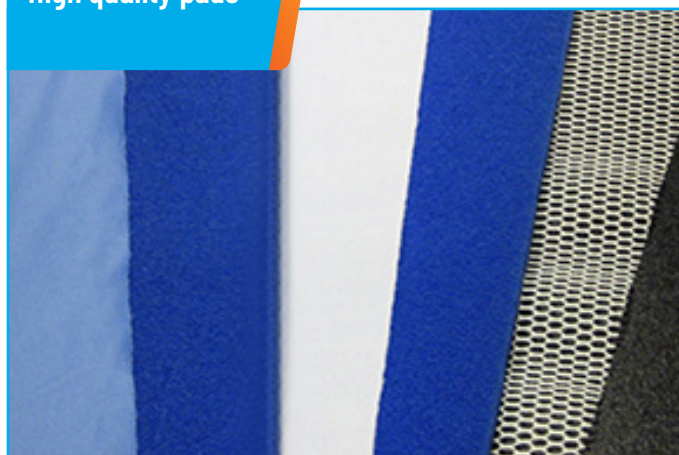

Convenient support for the hangers.

COST EFFICIENT
Low energy consumption and long lasting materials to curb running costs.

Surface heating switch

The table can be used either hot or cold. The surface heating element only draws 400W. Thanks to quality pads and optimized suction, ironing with a cold surface does not create condensation.

High quality pads

The standard pad has a double layer of highly transpirant foam and an inlayer of drop stop fabric to ensure a dry surface. Premium pads are available upon request.

Rust free surface

Aluminum ironing surface for long lasting, rust free operation.
